

Catalina 320

General Specs

The Catalina 320 is just a brilliant design, which has proved to be timeless, and has to be the roomiest boat of its size. A wide and modern transom also gives easy access to the sea, . This wider style of transom also gives this boat a steady downwind motion. Liberty is a great example of the 320. She is very clean and well maintained. The boat is easily handled. With replaced rigging and updated electric systems, there is nothing to attend too and we would encourage your interest.
