Builder	DiVine Craft & Stebercraft
Location	Rushcutters Bay, NSW
Price	\$285,000

A 'retro' style motor launch that has elegant lines, tumblehome topsides, an exaggerated sloping stern and beautiful teak decks which give her an irresistible warmth and feel. The DiVine 29 will set your heart racing and attract the admiration of others. The attention to detail and exacting combination of manicured lines and correct proportions put her in a special class.

A turbo diesel engine and water jet technology provide exhilarating performance, handling, stability and reliability that you could only expect from a boat of this calibre.

Thanks to the shallow draft provided by the use of the water jet, you can safely take your DiVine 29 to spots other boat owners can only dream about.

How about an intimate picnic at that special place? A nice 'European' feature is the comfortable sun lounge aft of the cockpit area, where you can relax on a lazy afternoon. Plus, the cockpit lounge easily converts to another comfortable place to stretch out, ideal for that siesta.

Built to original specifications, this DiVine has a high performance turbo diesel engine, you can be sure that you arrive at your destination before you even think about leaving. Divine Craft fit as standard Hamilton Water Jets. This not only fits with the philosophy of combining innovative ideas of the past and present, but more importantly gives many

other tangible benefits, too. First of all, the hull shape needed to be designed to exacting specifications. Achieving this extracts the optimum performance and handling for water jet propulsion.
