

Beneteau Sense 50

A very extensively optioned Sense 50 that has been equipped to cruise the Med and cross open oceans. All electric winches, Code Zero with furler, solar and wind power installed on a second spoiler / arch with davits for the tender, additional fuel tank, radar and extensive safety gear all make sailing easier for extended trips. A dock and go system allows you to manoeuvre the boat precisely in difficult anchorages, such as rear berthing in the med, where the carbon passerelle will come in handy. There are courtesy flags and pilot books onboard for virtually every destination you could want in the Med. Beyond that you have reverse cycle air conditioning, a 6Kva generator, water maker, washer dryer. This Sense has been given all the upgrades and is ready to start your Mediterranean cruising in safety and comfort.
