

Cape 50

General Specs

| | |
|----------|----------------|
| Length | 15.20 m |
| Beam | 4.35 m |
| Draft | 1.50 m |
| Year | 2023 |
| Location | Melbourne, VIC |
| Price | \$ 1,400,000 |

The Cape50 has been built for use in Australia, where the weather can turn quickly, wind, swell, and chop are all part of a normal day. To this end, you start to notice why the Cape50 has certain, very noticeable features that derive highly desirable benefits. Take the plumb bow, this not only increases the length of waterline, and volume up forward in her sumptuous accommodations, it also means the already fine entry is even more razor sharp to cut through the water better than ever and offer as little disturbance to her running attitude as is possible. The flat planning area in the stern where the Volvo Penta IPS drives are located is designed to make the Cape50 fast and efficient, and the square chine aids in stability, both underway and at rest. Heading further aft and in a nod to her Downeast inspiration, there is a delightful Tumblehome swinging the Cape50's lines around to her super-stylish reverse transom. Finally, you need distinguishing features, and a way to bring it all together into a harmonious and pretty craft. Meet the Cape50, where tradition and seaworthiness meet modern style, and European class. One man's passion. An entire team's dedication, and the total embodiment of why we all play with boats...
