Electrics / Electronics

Electrics	Electronics: Kookaburra is fitted with a B&G WTP Processor for processing of all input data at a much higher speed than
-----------	---

a regular processor, hence very good instrument data.
 The data gathered via the following in inputs:
 - 2 x paddle wheels for boat speed (port and starboard)
 - Depth and temperature sensor
 - MH unit fitted to top of mast
 - WTP rate gyro compass
 - Halcyon compass
 - Clinometer
 - Load cell pin for forestay load
 - String pot sensor for trim tab position
 - Furuno GP-37 GPS
 The data is displayed via:
 - 2 x H3000 GFDâ€™s mounted on deck
 - 2 x 20/20â€™s mounted in mainsheet island
 - 5 x 20/20â€™s on the mast
 - Any tablet or computer connected to wifi onboard, additional items include Linksys Wireless

Instruments /
Navigation

- 2x 12V Rolls Engineering S12-95 AGM house batteries
 - Mastervolt 12V/25Amp battery charger for when non shore power
 - 8 x Breaker switch board with voltage meter
 - Marco Marine 28L/ min Electric Bilge Pump with float switch and high-water alarm
 - Electric flush Jabsco marine toilet
 - Watertight USB sockets
 - 2 x 220V GPO when on shore power
 B&G WTP Processor

Sail / Rigging

Sail Inventory

original fractional, 2 spreader (with jumpers) alloy rig which has been completely re-fitted and painted. All new standing and running rigging fitted.
 The mast is adjustable fore and aft at the deck to ultimately control the sail plan in various conditions. As such, the mast has sliders fitted at deck level to allow it to move in the collar.
 New Stainless steel tie rods have been fitted to link the standing rigging to the actual chain plates which are underdeck. All underdeck rigging systems have been updated including through deck sheave boxes, tackle blocks and all lines.

Mast / Rigging

Boom: Carbon fibre boom with original vang set up and outhaul ram fitted.
